BACIT A Antibakteriyel Duyarlılık Besiyeri

**Boğaz Kültüründe
Hızlı Tanı**

- ✱ Boğaz kültüründe 1 günde A-Grubu Beta Hemolitik Streptokok tanısı.
- ✱ Basitrasin disk ve lateks aglütinasyon testlerine gereksinimi ortadan kaldırır. Bu testler için harcanan zaman, emek ve paranın arttırımını sağlar.
- ✱ Gereksiz antibiyotik kullanımını engeller.

- **BACIT A** AGBHS tanı süresini bir güne indiren, iki bölmeli Petri kutusunun birinci bölümünde koyun kanlı agar, ikinci bölümünde basitrasinli koyun kanlı agar içeren hızlı sonuç üreten orijinal patentli besiyeridir.
- Boğaz sürüntüsü her iki bölmeye de ekilen Hemostrep A'da bir gecelik inkübasyon sonucunda basitrasinsiz bölmede beta hemolitik kolonilerin görülmesi, basitrasinli bölmede bunların görülmemesi, üreyen streptokokların AGBHS olduğunu gösterir.
